Three types of white cladding sheets available

PALIGHT FOAM PVC sheets are ideal for wall cladding with a class 1 fire rating. The sheets are extremely lightweight and can be easily cut and installed with adhesives.

Palight sheets has good insulation, high chemical resistance and low water absorption properties. Palight sheets offers great value and the most cost effective option.

PALOPAQUE SOLID PVC sheets has class 1 fire rating with high impact strength and good scratch resistant. Excellent electrical and thermal properties, good resistant to chemical and corrosive environments and can be easily installed with conventional tools and adhesives. Palopaque are ideal sheets for busy environments where high impact strength and good chemical resistance properties are required.

POLYPROPYLENE sheets are used extensively in Hygienic Lining Systems, tough, chemical and impact resistant, it will stand repeated steam cleaning and is ideal in all food industry applications. High performance sheets which can be easily cut. Please Note: mechanical fasteners (rivets) are required. (Class 4 fire rating)
