

Perspex Duo Range

Perspex Duo – Double the effect

Perspex Duo is the latest innovative addition to the Perspex range; a rich, solid, black sheet incorporating an inbuilt layer of either Gold or Silver pigment that allows the black to show through when engraved.

Superb lustrous features

- ❖ Strong and vibrant metallic Silver or Gold layer
- ❖ Rich, black body of sheet
- ❖ Striking aesthetic especially under strong lighting
- ❖ Metallic layer is an integral part of the sheet and therefore will not delaminate
- ❖ Ideal for engraving and small area applications

Perspex Duo offers two beautiful effects in just one product – a metallic sparkle that contrasts elegantly with a rich black. However, should you choose not to engrave Perspex Duo, the Gold or Silver offers a deluxe feel as a solid sheet, with the metallic pigment giving it a lovely lustrous sheen whose vibrancy is further enhanced under strong lighting.

PLEASE NOTE:

Perspex Duo has been created specifically for small area flat engraving applications. For use in a larger area or thermoformed application, please contact us to check suitability and for further information about best practice and product characteristics.

Product Range

Two striking colours:

Gold 5YY9

Silver 9YY1

Sheet size 3x 2030 x 1270mm
