

Perspex Pearlescent Range

Shimmering sheer lustre

Part of the innovative range of Perspex from Lucite solutions, Perspex Pearlescent has been specially created to offer an attractive new effect to designers and specifiers.

In point of sale display, visual communications and other areas of design, such as furniture and interiors, Perspex Pearlescent has a unique appeal to produce products with a softly shimmering lustre.

Perspex Pearlescent has been launched in five exciting colour options to offer even more choice in today's contemporary retail environment.

Superb Features

- ❖ Soft shimmering lustre
- ❖ Totally new aesthetic
- ❖ Fascinating visual effect
- ❖ Easy to cut, join and fabricate
- ❖ Special thermoforming effects

The lustre in Perspex Pearlescent can provide exciting and unusual variations during bending or thermoforming and can even be further enhanced by subtle changes in light source and direction – so that virtually every point of sale display item crafted from Perspex Pearlescent could be considered almost unique.

Product Range

Five subtle shades
