

Perspex Sparkle Range

A sparkling performance

A shower of stars lights up the new Perspex from Lucite range. The shimmering effect that radiates from this material adds to the mystery of a collection that bears a very appropriate name: Perspex Sparkle. The six muted colours are enhanced by thousands of shimmering, iridescent particles that clean and shine like the surface of the celestial vault, producing a beauty that has to be seen to be believed, a subtleness that is gradually brought to light. Deep and yet radiant at the same time, the opaque colours of the range come together to form a harmonious collection: Scintillating Red, Flamboyant Brown, Captivating Green, Glittering Blue, Gleaming Violet and Shimmering Black... With a mere wave of a magic wand, Perspex reinvents the appearance of finely polished stone, producing a true-to-life mirror effect offering a wide range of opportunities for unusual interior and exterior applications.

Superb Features

- ❖ Reflective sparkle effect
- ❖ New attractive finish in the face of the material
- ❖ Mirrors the feel of highly polished stone
- ❖ For use in applications as signage, fabrication, POP and displays
